IDENTIFIERS *New Jersey

ABSTRACT

Opening fall enrollment trends for New Jersey colleges and universities for 1985 and 1986 are reported in narrative and statistical form. Fall undergraduate and post-baccalaureate full-time and part-time enrollments are presented by sector and for specific state colleges and universities, community colleges, and private colleges. A 1.5% decline in total full-time enrollment occurred (a 1.4% decline for undergraduates and a 2.1% decline for post-baccalaureates). The decline in the number of full-time undergraduates reflects a continuation of trends. The number of public high school graduates declined by 3.4%, while the number of college-bound high school seniors declined by less than one percent (.7%). There was a 1.4% increase in part-time enrollments (undergraduate enrollment increased by 1.7%, while post-baccalaureate enrollment remained stable). The growth in part-time undergraduates is attributed primarily to the community college sector. Post-baccalaureate enrollment remained stable because a decline for the private sector was negated by increases in the public sectors. (SW)

1986 Opening Fall Enrollment and Trends

Recent figures on Fall 1986 enrollment show that total enrollment in New Jersey colleges and universities[1] has stabilized. The fall 1986 total headcount of 297,399 represents a -0.1% decrease compared to 297,655 full- and part-time students enrolled in fall 1985. This is the smallest decline in total headcount reported since 1982. In the current year, there are fewer students enrolled at the graduate level (-0.6%); however, there is no change in the number of undergraduate enrollments. (See Attachment , Tables 1 and 2.)

Different types of enrollment exhibited different patterns of change. For example, attendance of full-time students continues a downward trend, declining -1.5% in 1986. Part-time attendance, however, has reversed its recent trend of decline and shows a 1.4% increase this year.

Overall, enrollment trends in New Jersey continue to lag behind those of the nation; estimated 1986 national data show increases in both full-time (1%) and part-time (2%) enrollments, resulting in a total enrollment growth in excess of 1%.

---

[1]Attachment , Tables 3 through 5 show the enrollment patterns for each institution. Please note that the current year's enrollment data are considered preliminary and subject to revision.

Full-time Enrollment: Total full-time enrollment in New Jersey declined -1.5%, from 150,271 in 1985 to 148,022 in 1986. The decline occurred among both undergraduates[2] (-1.4%) and post-baccalaureate students (-2.1%).

Full-time undergraduate enrollments declined in all sectors except Rutgers, where a 2.1% increase occurred, and U.M.D.N.J. The increase at U.M.D.N.J. reflects both a gain in the number of new students as well as the addition of a number of students cross-enrolled at other institutions. In prior years such data were not reported.

In the state college sector, Glassboro, Trenton, and Stockton experienced enrollment increases of 1.8%, 2.5%, and 5.3%, respectively. A less-than -2% decline in full-time undergraduate enrollment occurred at Kean and William Paterson. On the other hand, Jersey City, Montclair and Ramapo posted declines that exceeded 8%.

The community college sector shows an overall sector decline of -2.0%, yet, there are wide variations among institutions when 1986 and 1985 headcount enrollments are compared. Five county colleges experienced enrollment growth (ranging from 1.1% at Bergen to 19.8% at Atlantic), and

---

[2]The New Jersey enrollment projection model projected for fall 1986 a low total full-time undergraduate enrollment of 133,300. The actual number was 134,900.

11 colleges experienced declines (ranging from -0.9% at Brookdale to -31.7% at Passaic). The sector total also includes headcounts reported by two new community college commissions with approximately 900 students enrolled full-time.

Finally, among the independent colleges and universities, the comparison between 1985 and 1986 full-time undergraduate enrollments indicates an increase or stability at 10 institutions; last year this occurred at only 5 institutions. However, enrollment declines at the remaining 16 colleges were large enough to result in a sector decline of -2.7%.

The decline in the number of full-time undergraduates reflects a continuation of trends previously identified in other reports. The number of public high school graduates declined by -3.4%, while the number of college bound high school seniors declined by less than one percent (-.7%). However, the number of those seniors who choose to go on to college in New Jersey was lower, -1.9%. It should be noted, that between 1985 and 1986, the percentage of seniors going on to college increased from 57.8% to 59.4%; while the percentage of students choosing to go to college out of state increased slightly from 44.3% to 45.0% over the same time period.

The numbers of full-time post-baccalaureate students declined in all sectors except N.J.I.T. (which continued its trend of significant growth) and Rutgers (which increased slightly by 1.4%). The largest sector

decline occurred at U.M.D.N.J. (-9.8%). The state college sector declined -6.4%; the only state college that did not experience a decrease in enrollment was William Paterson. Among the independent colleges, half the institutions saw declines in enrollment and half experienced growth.

Part-time Enrollment: The total number of part-time students in New Jersey colleges rose between 1985 and 1986 by 1.4%, from 147,384 to 149,377. Undergraduate enrollment increased by 1.7%, while post-baccalaureate enrollment remained stable.

The growth in the number of part-time undergraduates is attributed primarily to the community college sector, which increased its enrollment by almost 2,000 students. Increases also occurred at Rutgers (0.8%), Thomas Edison (5.7%), and U.M.D.N.J. (250%, the raw number of students here is quite low). Enrollments in the state college sector remained unchanged compared to last year. Declines in enrollment occurred at N.J.I.T. (-6.4%) and among the independent colleges (-0.4%).

In the category of part-time post-baccalaureate students, total enrollment remained stable because the -2.5% decline in the independent college sector was negated by increases in the public sectors. Rutgers enrollment grew by 2.2%, N.J.I.T. by 5.6%, and U.M.D.N.J. by 7.2%. A small increase of 0.3% was experienced by the state college sector.

Summary

The decline in enrollment at New Jersey colleges and universities continues at a pace anticipated in the planning models developed by the Department; that is, a less than 2% decline in full-time enrollment and a less than 1% decline in total enrollment. It is anticipated that moderate declines will continue to occur between now and 1990, followed by more dramatic reductions between 1990 and 1995.
